

DIFFICULT RUN

Draft Plan Review Workshops

Come to a Difficult Run Watershed Draft Plan Review Workshop to learn about proposed projects to reduce flooding, restore streams, and protect wildlife and drinking water sources.

Why a Watershed Plan?

The Difficult Run watershed is the land that drains to the main stream, Difficult Run, and ultimately the Potomac River, the source of drinking water for many residents. This watershed is showing signs of degradation, such as streambank erosion. The watershed plan will outline a strategy to solve problems and protect natural resources in the watershed.
